-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a method of bonding.

Group II, claim(s) 13-25, drawn to a method of bonding.

Group III, claim(s) 26-31, drawn to a method of bonding.

Group IV, claim(s) 32-38, drawn to an article.

Group V, claim(s) 39-45, drawn to an article.

Group VI, claim(s) 46-52, drawn to an article.

Group VII, claim(s) 53-64, drawn to a method of bonding.

2. The inventions listed as Groups I through VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature in the groups is use of a universal solder and pressing two components together with the solder in between, however the use of a universal solder

(i.e. a low melting temperature solder doped with at least one rare earth element, instant specification page 4 lines 16-17) is known in art as exemplified by Nagano et al. USP 3,949,118 (see abstract) which is placed between two components (see column 6 - EXAMPLES) and therefore the use of a universal solder to bond two components does not contribute to the art such that it could be considered a special technical feature and the claims lack a unity of invention. It is also noted that an oxide skin inherently forms on the surface of the solder when in atmosphere and naturally collapses during the joining process.

3. A telephone call was made to Daniel Sierchio on January 28, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
